MAHESH SANGRAM SWAMI

Full Stack Developer | Software Developer | Cybersecurity Enthusiast
Nanded, Maharashtra, India | [9022731301] | Email: [swamimahesh202@gmail.com]
LinkedIn: [https://www.linkedin.com/in/mahesh-sangram-swami-915a6028b]

PROFESSIONAL SUMMARY

Information Technology engineering student with a strong interest in Full Stack Web Development, Software Engineering, and Cybersecurity. Experienced in building web applications with modern frontend and backend technologies, REST APIs, databases, and authentication, with a solid foundation in Data Structures & Algorithms, DBMS, Computer Networks, Operating Systems, and OOP. Familiar with Git, Linux, Nmap, Burp Suite, Metasploit, and Postman. Seeking an internship or entry-level role in software development or security-focused engineering.

EDUCATION

B.E. / B.Tech in Information Technology ***[2023 – 2027]***
M.G.M.'s College of Engineering, Nanded |DBATU Lonere — CGPA: [7.58]

Higher Secondary Certificate (12th) ***[2023]***
Vikas Junior College,Atnoor — Percentage: [51.50]

Secondary School Certificate (10th) ***[2021]***
Vikas Vidhyalaya school,Atnoor — Percentage: [91.20]

TECHNICAL SKILLS

Languages: Java, JavaScript, Python, C, c++, SQL.

Frontend: HTML5, CSS3, React.js, Responsive Web Design

Backend: Node.js, Express.js, REST APIs, Spring Boot (fundamentals), Authentication & Authorization

Databases: MySQL, MongoDB, Database Design

Cybersecurity: Kali Linux, Nmap, Burp Suite, Metasploit, Subfinder, OWASP concepts, Reconnaissance & Enumeration, Basic Vulnerability Assessment

Core CS: Data Structures & Algorithms, OOP, DBMS, Computer Networks, Operating Systems, Software Engineering

Tools: Git, GitHub, VS Code, Postman, Linux Terminal, Figma (basic)

PROJECTS

Smart Helpdesk Ticketing & IT Service Management System *Academic / Development Project*

Tech: React.js, Node.js, Express.js, MongoDB, REST API, JWT

- Built a web-based IT support platform where users report issues and support teams assign, track, and resolve tickets.
- Implemented JWT authentication, role-based access control, and an admin dashboard.
- Added ticket priority/status management, search and filtering, and resolution tracking via REST APIs backed by MongoDB.

Adaptive Road Intelligence & Autonomous Vehicle Safety System *Academic / Development Project*

Tech: Python, Computer Vision, AI/ML, Web Technologies, APIs, Database

- Designed the architecture and workflow of an intelligent road-safety system for road-condition and pothole detection.
- Worked on location-based road-risk identification, emergency/safety alert workflow, and an e-Challan demonstration.
- Built a modular design with data collection and visualization, ready for future AI/IoT integration.

Web Security Vulnerability Scanner *Personal / Learning Project*

Tech: Python, Linux, HTTP Requests, Web Security

- Developed a command-line tool that runs basic automated checks on authorized web applications.
- Includes URL validation, HTTP response analysis, security header checks, basic endpoint discovery, and report generation.
- Used only on systems where authorization was provided, following ethical hacking practice.

ACHIEVEMENTS & ACTIVITIES

- Regular hands-on practice with cybersecurity labs and CTF challenges.
- Built academic projects that combine software development with cybersecurity concepts.
- Continuously learning emerging IT technologies, including Cloud, DevSecOps, and AI.
- Successfully completed a four-day workshop on Embedded Systems and Internet of Things (IoT).
- Actively developing skills in Full Stack Development, Java, Data Structures & Algorithms, and Web Application Security.
- Participated in hands-on technical training focused on IoT applications, sensors, microcontrollers.

TRAINING AND WORKSHOP

Cybersecurity Trainee, SecureLayer7 ***[OCT-2026]***

- Trained in Linux/Kali Linux, network scanning and enumeration with Nmap, and Metasploit fundamentals.
- Practiced web application security testing with Burp Suite, HTTP request/response analysis, and vulnerability assessment.
- Completed hands-on security labs and CTF-style challenges, including PortSwigger Web Security Academy.

Embedded System and Internet of Things (IoT) ***[MAY-2025]***

- Completed a four-day hands-on workshop covering Embedded Systems and Internet of Things (IoT) fundamentals.
- Learned the basics of IoT architecture, sensors, microcontrollers, embedded programming, and device communication.
- Gained practical exposure to IoT-based applications, hardware–software integration, and real-world automation concepts.

CERTIFICATIONS

1.COMMUNICATION SKILL	**TCSION, Apr-2024**
2.DATA STRUCTURES AND ALGORITHMS IN PYTHON	**INFOSYS, Apr-2025**
3.THE JAVA LANGUAGE	**LEARNQUEST, July-2025**
4.SOFTWARE ENGINEERING	**INFOSYS, Aug-2025**
5.GEN AI FOR SOFTWARE ENGINEERING TEAM	**COURSERA, SEP-2025**

ADDITIONAL INFORMATION

Soft Skills: Problem Solving, Analytical Thinking, Team Collaboration, Communication, Quick Learning, Time Management, Adaptability

Languages: Marathi (Native), Hindi (Fluent), English (Working Proficiency)

Interests: Full Stack Development, Web/Application Security, Ethical Hacking, Cyber security Cloud & DevSecOps, AI, Intelligent Transportation Systems.

DECLARATION

I hereby declare that the information provided above is true and accurate to the best of my knowledge.
